Hi!

Below is all the data about the project/job that should be roughly (but realistically) estimated.

The fields marked by asterisk (*) are mandatory. Other fields could be empty.

#1: BASIC PROJECT INFO

1.1 Project Primary Type*: Machinery and Equipment Moving

1.2 Project Description*: Install to final location requires moving MD-2030, unit just need to be placed in location at site.

For A/AD/ADH/D series, standard part capacity is 54"
For MD series with Flux Flow Coils, standard part capacity is 41"
Standard foot print: 89 x 41 in / 226 x 104 cm
Weight 800 lbs

Entry ways

There are two entry ways into the lab location: The exterior door into the lab is a standard 36" single door. The exterior door into the building has two (2) 36" doors with a removable mullion, with an interior door to the space of 42". There are two (2) 42" doors to enter the space.

1.3 Preferred Service Date: 2024-05-15

#2: EQUIPMENT/LOAD DETAILS

2.1 Number of Equipment/Load Items*: 1

2.2 Equipment/Load Details*: For A/AD/ADH/D series, standard part capacity is 54"
For MD series with Flux Flow Coils, standard part capacity is 41"
Standard foot print: 89 x 41 in / 226 x 104 cm
Weight 800 lbs

#3: LOGISTICS REQUIREMENTS

3.1 Pickup Location*: 218 E Industrial St, DeWitt, IA 52742

3.2 Delivery Location*: 9000 College Pkwy, Palos Hills, IL 60465

3.3 Route Preferences: No preference

3.4 Distance to be Moved*: 161.3 Miles

3.5 Predominant Terrain Type*: Paved Roads, Urban Area

#4: SPECIAL REQUIREMENTS

4.1 Handling Requirements: Unit will be crated, just requiring removal of crating material after. If not, we will have a technician onsite to help remove crating.

4.2 Environmental Concerns:

4.3 Permits Required?*: No

4.4 Insurance Required?*: Yes

#5: PROJECT COMPLEXITY

5.1 Site Accessibility*: Moderate

5.2 Installation or Assembly Required?*: No

5.3 Safety and Compliance Requirements:

STEP #6: FINANCIAL INFO

6.1 Estimated Budget Range: Unknown.

6.2 Preferred Payment Structure*: Payment Upon Completion

6.3 Preferred Payment Currency*: USD: United States Dollar

6.4 Custom Note:

Based on the provided project details, the preliminary cost estimate for moving and installing the MD-2030 unit is as follows:

Estimated Price Range: \$2,500 - \$3,500 USD

This estimation includes:

- Pickup and delivery of the equipment from DeWitt, IA to Palos Hills, IL
- Handling and removal of crating material
- Insurance coverage for the equipment during transit

Assumptions:

1. The weight and dimensions of the equipment do not require special transportation arrangements beyond a standard heavy-duty truck.
2. The moderate site accessibility does not involve any significant obstacles that would require additional equipment or labor.
3. The lack of specific safety and compliance requirements means standard safety protocols will be followed.
4. The absence of any environmental concerns or permit requirements.
5. The cost of fuel, labor, and other logistics-related expenses are based on current market rates.
6. The preferred payment structure is a single payment upon completion of the project.

Please note that this is a preliminary estimate. The final cost may vary depending on various factors such as changes in fuel prices, unforeseen logistical challenges, etc. A more detailed quote can be provided upon further discussion.
